

Deliver Limitless Learning Opportunities  
with a High-Capacity WAN

## UDT Wide Area Network (WAN)

Today's school districts need enterprise-grade connectivity to seamlessly fuel the expansion of their digital environments.

Legacy infrastructure and fragmented networks can pose serious performance and security risks

An inflexible network architecture can make it challenging to integrate additional sites and scale broadband capacity

Unpredictable repair, maintenance, and replacement costs can result in substantial capital outlays

### Keep your K12 campus connected around the clock with UDT WAN.

- › Deploy a tailor-made, flexible network that empowers your school district's ongoing growth and innovation
- › Safeguard your network with advanced security protocols and 24/7 monitoring and support
- › Optimize performance by leveraging advanced technologies and adaptive learning capabilities
- › Eliminate unpredictable capital and operating expenses with comprehensive managed broadband

**Cost-effectively support your digital ecosystem with reliable connectivity. UDT WAN delivers robust, high-speed, and ultra-secure connections that meet the escalating traffic demands of modern school districts.**

#### › Flexible, Future-Ready Design

Boost network performance and ensure seamless, scalable connectivity. Our vendor-neutral approach enables school districts to strategically deploy equipment that aligns with their requirements.

#### › Advanced Security

Benefit from rigorous security protocols designed to protect your network. From daily audits and software validations to 24/7 proactive monitoring and support, experience peace of mind with a full-coverage partner.

#### › End-to-End Management

Gain reliable performance with comprehensive support, complete customization, and enhanced adaptability. Our industry experts have you covered, freeing up your internal teams to focus on other important priorities.

#### › 24/7 Support

Feel confident with 24/7 support. Our experts operate behind the scenes to monitor and neutralize issues before they make an impact. Need something? Our live customer support team will be ready and available to assist you.

#### › E-Rate Expertise

As a top ten national E-Rate provider, UDT has the experience and knowledge to help your school district optimize the impact of available Category 1 and Category 2 funding streams on eligible infrastructure and services.

#### › Actionable Insights

Know what's happening in your environment. You can stay abreast of your network via the UDTHub, your single pane of glass for real-time insights, performance metrics, bandwidth utilization reports, analysis tools, and more.

# Experience the Power of Reliable Connectivity with UDT WAN.

Ensure seamless connectivity, robust performance, and strategic growth when you partner with UDT.

- Tailored network design
- Layer 3 networking equipment and circuit
- Provisioning, implementation, and installation
- Field engineering resources
- Maintenance of circuits and networking equipment
- Ongoing performance and security evaluations
- 24/7 network monitoring and customer support
- Network performance and utilization metrics

## Let's Get Started!

Contact UDT today to deliver fast, secure connectivity to your school district. We'll help you create scalable, resilient learning environments you can count on to enrich your digital ecosystem and amplify student success.

For more information on UDT WAN, contact your UDT account representative, call (800) 882-9919 or visit us at [udtonline.com](http://udtonline.com).
